CBC RARE BIRD DOCUMENTATION FORM

Submitted as documentation of (check all that apply):

☒ Unusual species ☐ Unusual date ☐ Unusual habitat

1. Count Name: *GRAND JUNCTION, COLORADO* Count Code: *COGJ*

2. Species *Anna's Hummingbird* Age *adult* Sex *F* # *1*

3. Date (s) of Observation *DEC. 19, 2004* Time *9:05 a.m. to 9:08a.m.*

Earlier/Later dates by others, if known *.Dec. 4*, and probably daily through December and well into 2005. It is still being seen.

4. Place *2842 Oxford Ave.*

Nearest town *Grand Junction* County *MESA*

5. Observer: *Robert Bradley*

Address *2277 El Verano Ct., Grand Junction, CO 81503*

Telephone/fax/e-mail *970-263-4613/ azbradley@earthlink.net*

6. Observation Details:

Other Observers: *many observers*

Optics used *B&L Elite 10x42*

Distance from bird *10-20 ft.* Viewing conditions *excellent*

Weather, sky cover *partly cloudy*

Photo taken? *Yes* Video? *No* Sound recording? *No* Specimen? *No*

Are these available to the CBC Regional Editor? *Yes* Where are they? *Being forwarded*

Past experience with this or similar species? *35 years in AZ, CA*

8. References or advice consulted: *None*

9. Was this report done from notes made during or after observation or from memory? Date of obs.

10. Notes: On back of form give complete details of this observation. Use additional sheets as needed. Include information on the bird's plumage, shape, size, vocalizations, habitat, behavior, etc. Describe exactly what you saw; include photocopies of your original notes and sketches. Name the species that you considered ID contenders; explain how you eliminated them.

See forwarded notes and photo by Steve Bouricius

Signature *Robert C. Bradley* Date *Mar. 5, 2005*

Subject: Anna's Hummingbird Grand Junction, CO 2004 CBC

> Bob,

>

> Here's a brief note on the wintering Anna's Hummingbird for the CBC

> record, and a mention of the wintering Costa's:

>> 12-04-2004

> Following up on a tip of a late hummingbird (on 12-04-2004), Steve and

> Debbie Bouricius captured and banded, an adult female Anna's

> Hummingbird using a feeder in the Orchard Mesa area of Grand Junction,

> Mesa County, Colorado. The bird had been seen for about two weeks

> prior to this date, and is still present as of March, 1, 2005. It was

> observed and counted on the Dec. 19th Grand Junction Christmas Bird Count.

>

> Measurements and in hand photos were taken of identifying features in

> the wing and tail which positively ID the Anna's. The bird has about

> 30 pink-orange red gorget feathers. She weighed in at 4.4 grams, a

> very healthy weight, but like the Costa's we banded earlier today,

> this bird had no reserves of body fat which may indicate she will not

> migrate until the weather changes significantly. The hummer host has

> been faithfully maintaining a feeder, taking it in at night and

> putting it back each morning. There is a snow shield and a light on

> the feeder to keep it thawed during these very cold days. Night time

> low temperatures in late November and early December were from -1°F to

> 6°F. The Anna's was often observed flycatching on warm days throughout

this period.

>

> On the same day,(12-04-2004) Steve and Debbie also captured and banded

> an adult female Costa's Hummingbird coming to a feeder in Clifton,

> Mesa County, just outside the Grand Junction count circle. This bird

> remained until 9:30 a.m., January 29, 2005, a relatively warm and

> sunny

day.

>

> This was a rare and special opportunity for many Colorado birders to

> see both Calypte hummingbirds in the state. We think of them as hardy

> pioneers exploring new territory on the American frontier.
