Colorado Field Ornithologists Sight Record Form (This is a two-page report. Please print or type. Attach photographs and additional pages if necessary.) Each table cell will automatically enlarge as you type!

CFO-RC FILE X:

RESULTS:

Species: (Common Name) **Blue-winged Warbler** (Scientific Name) *Vermivora pinus*

Date(s) of occurrence: April 28 and 29, 2000,

Number of birds seen: one Sex: male Plumage: alternate

Exact location: Ft. Lyon Wildlife Easement, Rd 16 and HH in Bent county, Colorado

County: Nearest town: Ft. Lyon **Elevation:** John Martin Res elevation

Length of observation: 5 minutes/ 10 minutes Time(s) of observation: approx. 1300/ approx. 900

Other observers who saw the bird(s) with you: Dave Quesenberry/mob

Other Observers who independently saw the bird(s):

Light Conditions (quality; direction relative to bird(s); position: Full sun, light south breeze/ Partly cloudy, windy from the SE

Optical equipment used: Ziess 10x40

Distance from bird(s) (estimated unless otherwise noted): 30 feet/30 to 100 feet

Was bird(s) photographed? not sure If so, have you submitted photos?

Who took the photographs?

Describe the general and specific habitat in which the bird(s) occurred:

Lakeside Riparian

Describe the bird's behavior (flying, feeding, habits, behaviors used in identifying the Species or in supporting the identification): foraging in the cottonwoods and elm trees occasionally stopping to sing.

Describe the bird in detail. This is the most important part of this report. Include the overall size and shape and how you placed the bird in the general group that you did. Give complete details of plumage, including head, throat, undersides, nape, back, wings and tail. Give particular emphasis to marks you used to identify the bird(s). Describe other important details, such as color and shape of bill, legs, eye, (etc.) that were important in making the identification. (Fill out this portion even if photographs are submitted; you may attach additional sheets, drawings, field sketches or copy field notes): The bird was a medium sized warbler with a black legs, bill and eyes. The head was yellow with a black stripe that ran from the bill base through the eye and terminated behind the eye. The crown was yellow, gradually turning greenish yellow in the nape and more greenish on the back. Rump color was not noted. The wings and tail were a grayish blue in color. The wings had two pale off-white wing bars. The breast, belly and undertail coverts were yellow.

Describe bird's call or song: Two short buzzy notes followed by a soft multi-noted warble or trill. All very faint, and difficult to hear.

Discuss similar species and how you eliminated them: Similar species being Yellow, Prothonotary, Golden-wing Hybrid, Orange Crowned and some 'Wilsonia' females. are eliminated by the wing bars and/or the facial pattern.

What is your prior experience with this and similarly appearing species?

I've seen quite a few growing up.

List books, guides, recordings or other sources consulted and how this influenced your identification (during and after observation): Nat. Geo. 3rd Edition for the scientific name

This report is from notes made during (Taped x) or after observation or later x from memory

Date of written report: May 21, 2000
