

VERIFYING DOCUMENTATION OF AN UNUSUAL RECORD

52-73-25

1. Species: Golden-winged Warbler | Vermivora chrysoptera 2. Number: accepted
 (Vernacular Name) (Scientific Name) gR 12/9/73

3. Location: Bear Canyon - foothills, Boulder

4. Date(s): May 20, 21 1972 5. Time bird seen: 20 ~ 0800 - 5 min
21 ~ 0830 - 10-15 min

6. Description of size, shape and color-pattern. (Describe in great detail all parts of the plumage including beak and feet coloration in addition to the diagnostic characteristics; however, include only what actually was seen in the field):

This was a full plumage singing adult bird. It was located both days by song and observed at some length - on the 21st by an entire field trip at the CFO convention. Since this bird cannot be mistaken for anything else, it would be pointless to describe it in detail.

7. Description of voice, if heard: Singing both days - was located by song. Buzz, Buzz, Buzz, Buzz. Don't remember latter notes being lower in pitch as Field Guides suggest.

8. Description of behavior:

Typical warbler insect hunting

9. Habitat--general: riparian streamside growth } some place both days.
 specific: willows, mountain maple

10. Similarly appearing species which are eliminated 6, 7 and 8 above; Explain:
 absolutely none.

11. Distance (how measured?): est - 20-30 yards

 clear light to side and behind both days

14. Previous experience with this species and similarly appearing species:
 quite familiar in east

15. What made you think this species was unusual or rare?

There are sufficient sight records (all unofficial) that I have put off turning this in. I was aware of it.

16. Other observers: Most of CFO official Records Committee, on 21st. Myself on 20th.

H. Kinyery, D. Griffiths, T. Marsh, and about 20 other CFO members.

17. Did others agree with your identification?
