Describe the general and specific habitat in which the bird(s) occurred: Bird was on bare ground with House Sparrows.

Describe the bird's behavior (flying, feeding, habits, behaviors used in identifying the Species or in supporting the identification): Seemed to be feeding on ground but flew soon after I began watching. At first only one bird was seen. I left after it flew. Returned about 15 minutes later and second bird was present. Both were on ground but again flew as I approached.

Describe the bird in detail. This is the most important part of this report. Include the overall size and shape and how you placed the bird in the general group that you did. Give complete details of plumage, including head, throat, undersides, nape, back, wings and tail. Give particular emphasis to marks you used to identify the bird(s). Describe other important details, such as color and shape of bill, legs, eye, (etc.) that were important in making the identification. (Fill out this portion even if photographs are submitted; you may attach additional sheets, drawings, field sketches or copy field notes): Key marks were black on back on neck, black wing tips. IN flight the tail was rounded, not pointed as Mourning Dove. White in corners of tail.

Describe bird's call or song: Did not hear

Discuss similar species and how you eliminated them: Key marks separated it from Rock Dove or Mourning Dove.

What is your prior experience with this and similarly appearing species? Have seen at Rocky Ford.

List books, guides, recordings or other sources consulted and how this influenced your identification (during and after observation):
