CFO-RC FILE X:

**RESULTS:**

Species:(Common Name) White-winged Dove

(Scientific Name) Zenaida asiatica

Date(s) of occurrence: 10-May-00

Number of birds seen: 1

Sex: unknown

Plumage: adult

Exact location: north side of parking lot across street north of Campo Café in Campo

County: Baca

Nearest town: Campo

Elevation: 4339 ft

Length of observation: 5+ minutes

Time(s) of observation: 8:50am &amp; 9:05am

Other observers who saw the bird(s) with you: alone on initial observation & with Tony Leukering & Jeff Schultz on 2<sup>nd</sup> observation

Other Observers who independently saw the bird(s): none

Light Conditions (quality; direction relative to bird(s); position: mostly sunny, sun at all angles since bird moved around during observation

Optical equipment used: Swift Osprey 7.5x42

Distance from bird(s) (estimated unless otherwise noted): 15 to 50 ft

Was bird(s) photographed? Yes

If so, have you submitted photos? No

Who took the photographs? Tony Leukering

Describe the general and specific habitat in which the bird(s) occurred: habitat was backyard with 10 to 20 ft tall trees then refound bird sitting on a utility wire

Describe the bird's behavior (flying, feeding, habits, behaviors used in identifying the Species or in supporting the identification): initially heard the bird vocalizing, when found the first time the bird was skittish when approached within 20 ft and would fly to adjacent tree to perch on horizontal perch; refound sitting on a utility wire with Tony &amp; Jeff; note: a Eurasian Collared-dove was sitting on a utility pole nearby

Describe the bird in detail. This is the most important part of this report. Include the overall size and shape and how you placed the bird in the general group that you did. Give complete details of plumage, including head, throat, undersides, nape, back, wings and tail. Give particular emphasis to marks you used to identify the bird(s). Describe other important details, such as color and shape of bill, legs, eye, (etc.) that were important in making the identification. (Fill out this portion even if photographs are submitted; you may attach additional sheets, drawings, field sketches or copy field notes): mid-sized dove/pigeon; dark bill and rounded head; color was overall grayish tan with a black crescent on side of neck/cheek and white line along lower edge of wing while perched; when in flight the large white wing patches were evident; the tail was "squared-off" compared with that of a Mourning Dove and had white outer tips

Describe bird's call or song: 4 "hoo's" with the 2<sup>nd</sup> hoo being higher pitched; after reading the Peterson Guide the phrase "who cooks for you?" fits the vocalization

Discuss similar species and how you eliminated them: not a Mourning Dove due to vocalization, tail being "squared-off" and white wing patches; not a Band-tailed Pigeon due to vocalization, white patches and overall color; not a Eurasian Collared-dove or due to vocalization, and white patches in wing; not a Spotted Dove due to no spotted nape &amp; white wing patches; not a Rock Dove due to vocalization &amp; white wing patches &amp; no white rump

What is your prior experience with this and similarly appearing species? Observed and heard many times while living in TX and visiting AZ

List books, guides, recordings or other sources consulted and how this influenced your identification (during and after observation): none during observation; Peterson Guide to Western Birds after observation

This report is from notes made during or after observation or XXX later from memory

Date of written report: 16-May-00

Reporting observer: Darrin O'Brien

Signature: 

Reporting Observer's Address: 9018 Fawn Ct

City: Louisville

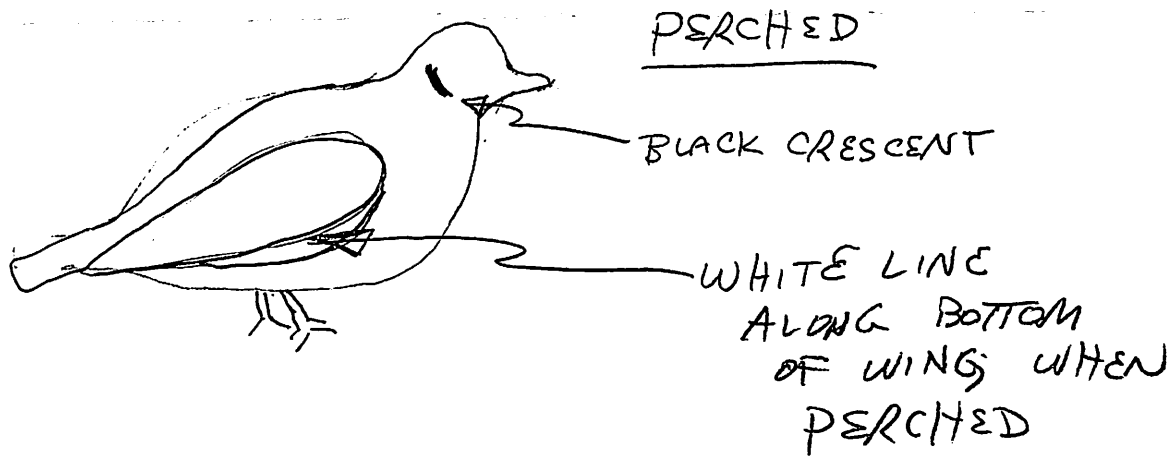

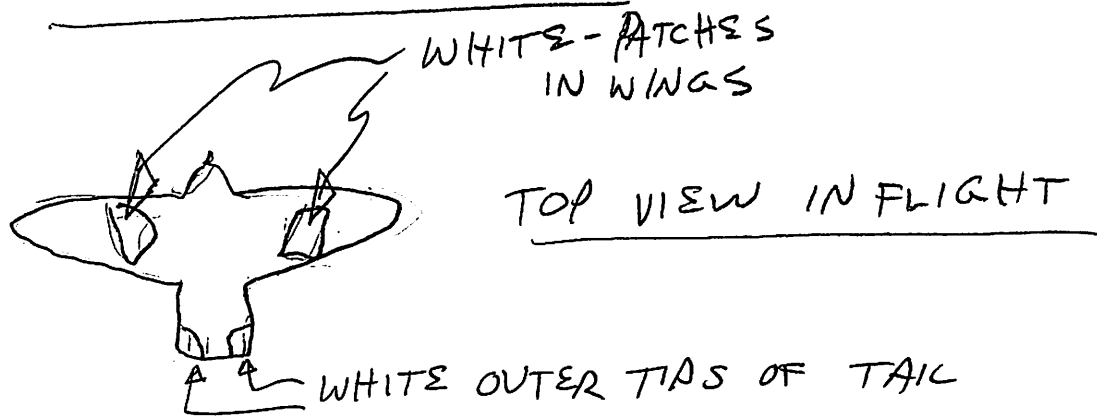

State: KY

Zip: 40242
