COLORADO FIELD ORNITHOLOGISTS SIGHT RECORD FORM

(Please print or type. Attach photographs, drawings, and additional pages if necessary.)

Recd 3/9/00 uplSpecies : Inca Dove Columbina inca
(Common Name) (Scientific Name)Date(s) of observation : Feb. 27, 2000Number of birds seen : 2 Sex : ? Plumage : adultExact location : S.E. corner of intersection of Virginia & Washington Aves. in Rocky FordCounty : Otero Nearest town : _____ Elevation : 4150Length of observation : one minute Times(s) of observation : 7:30 A.M.Other observers who saw the bird(s) with you: noneOther observers who independently saw the bird(s) : Feb 29 - Percival, Wood, Ditley & Kokuloff; Mar 5 - Janos, Olsen & QuisenberryLight conditions (quality; direction relative to bird's; position) : Sunny - ~~from~~ from behind observerOptical equipment used : Celestron Regal 8x42 binocularsDistance from bird(s) (estimated unless otherwise noted) : 50 ft.Was bird photographed? : NO If so, have you submitted photographs? _____

Who took the photographs? _____

Describe the general and specific habitat in which the bird(s) occurred :

both birds flew into a small ash tree, then flew south into alley in residential area

Describe the bird's behavior (flying; feeding; habits; behaviors used in identifying the species or in supporting the identification) :

flew fairly rapidly and direct

Describe the bird(s) in detail. This is the most important part of this report. Include overall size and shape, and how you placed the bird(s) in the general group that you did. Give complete details of plumage, including head, throat, undersides, nape, back, wings, and tail. Give particular emphasis to marks you used to identify the bird. Describe other details, such as color and shape of bill, legs, eye, (etc.) that were important in making the identification. (Fill out this portion even if photographs are submitted; you may attach additional sheets, drawings, field sketches, or copy of field notes) : I saw one bird fly up into the tree about 15 ft off ground from about 50 yards away. I thought it was a solitaire. When I stopped to look at it with binoculars it had a dove head and was gray and was about the size of a solitaire. When a second bird flew into the tree I could see it had a brownish black tail with thin white edge that was squared off. Its back was gray

Describe bird's call or song: Not heard with distinct black scalloped edges to feathers.

Discuss similar species and how you eliminated them :

Tail too long for ground-dove and was squared off, not pointed as in mourning dove.

What is your prior experience with this and similarly appearing species?

Seen in Phoenix, AZ 15 years ago

List books, guides, recordings, or other sources consulted and how these influenced your identification (during and after observation) :

NG 3rd editionThis report was made from notes made during ✓ or after _____ observation, or later from memory _____

Date of written report : _____
