Please print or type. Attach photographs and additional pages if necessary.

Species: Prairie Warbler | _____
(Vernacular Name) (Scientific Name)Date(s): 6-7 June 2000Number of birds seen: 1 Sex: male Plumage: adultLocality: Two Buttes Reservoir (below dam) Elevation: _____Nearest town: Two Buttes County: BacaTime(s) observed: 2-4 PM (6/6) 9-10 AM ? 5-6 PM (6/7)Duration of observation (e.g. 1 sec., 5 min., etc.): ~ 2 hours total

Other observers who saw the bird with you (give names, addresses, telephone numbers):

Bryan Will (heard it)
Janeal Thompson

Other observers who saw the bird independently (give names, addresses, telephone numbers)

Dave Grote, others?Light conditions (position of bird to light and shade, direction and strength of light):
variousOptical equipment used (e.g. power, types): 8x42 B&L ElitesDistance, and how measured: 20' at the closestIf photographed, type of equipment and film: Gold 100 Print film 100-300 Tokina telephoto

Who else photographed the bird? _____

Describe the bird's behavior (e.g. flying, feeding, or habits used in identifying):

The bird acted territorial. constantly singing from shrubs (mt - mahogany, cottonwood, willows). This went on for the two days I was there and apparently for days afterward. Bird worked entire area at toe of dam (east of dam).

Describe in detail the bird's relative size, overall shape, plumage and color pattern. Include details of bill, wing and tail shape. Give particular emphasis to marks you used to identify the bird. Reference to its resemblance to field guide descriptions and illustrations is not enough. Describe only what you actually observe in the field:

Small mostly yellow passerine. Sharp bill like warbler. Blackish stripes (few) on flanks. Dark grayish eye line and diffuse gray area outlining the lower auricular patch. This created a bright yellow area immediately below the eye. Back green-gray with rusty-brown streaks. Two faint yellowish wingbars. Undertail yellow. Crown gray-yellow. Eyebrow yellow. Bill & legs dark gray. Eye black.

Description (continued):

Describe the bird's song and call, if given, including method of delivery, (i.e. from perch, in flight, duration):

Up the scale
accelerating in cadence

buzzy

This is what clinched ID before I saw it (a voice from yester year
Describe the general and specific habitat in which you observed the bird: in Ohio)

How did you eliminate similarly appearing species?

Nothing else sings that song.
Brown stripes on mostly yellow warblers like nothing else.

What is your prior experience with this and similarly appearing species?

I have seen dozens in Ohio, NC, Texas

List books, illustrations, recordings, other birders, etc. consulted and how this influenced your identification:

a) at time of observation: _____

b) after observation: _____

This report was written from reports made during X, after observation X from memory X
Date and time report was written: _____
