(Please print or type. Attach photographs, drawings, and additional pages if necessary.)

rec'd 6/30/02

Species: Painted Bunting female Passerina ciris
(Common Name) (Scientific Name)Date(s) of observation: May 16, 2002Number of birds seen: 1 Sex: Female Plumage: Bright green - pale yellow breastExact location: 714 Carson Ave. La Junta, Colorado 81050County: Otero Nearest town: _____ Elevation: 4068Length of observation: 30 minutes Times(s) of observation: OneOther observers who saw the bird(s) with you: George Brenneman (Husband)Other observers who independently saw the bird(s): NoneLight conditions (quality; direction relative to bird's position): 6 PM - SunlightOptical equipment used: Nikon Binoculars - Also no binocularsDistance from bird(s) (estimated unless otherwise noted): 12 feetWas bird photographed?: yes If so, have you submitted photographs? yesWho took the photographs? George Brenneman (Husband)

Describe the general and specific habitat in which the bird(s) occurred:

 at base of tree below hanging bird-feeder
Flew in at same time with an indigo bunting.

Describe the bird's behavior (flying; feeding; habits; behaviors used in identifying the species or in supporting the identification):

Found bird at base of big tree below bird feeder eating thistle seed + other
finch food. Never saw it fly but the bright green color is what caught my eye.
knowing it was something really different.

Describe the bird(s) in detail. This is the most important part of this report. Include overall size and shape, and how you placed the bird(s) in the general group that you did. Give complete details of plumage, including head, throat, undersides, nape, back, wings, and tail. Give particular emphasis to marks you used to identify the bird. Describe other details, such as color and shape of bill, legs, eye, (etc.) that were important in making the identification. (Fill out this portion even if photographs are submitted; you may attach additional sheets, drawings, field sketches, or copy of field notes):

Bird approx 5 1/2 inches long appearing bright green over
head, back + tail. Very pale blue area appeared on forewired part of upper wing.
Breast appeared pale yellow in color. no wing bars. Beak - a typical bunting beak.

Describe bird's call or song:

Didn't hear

Discuss similar species and how you eliminated them:

Indigo bunting - Color + bird book info

What is your prior experience with this and similarly appearing species?

none

List books, guides, recordings, or other sources consulted and how these influenced your identification (during and after observation):

Peterson's field guide - Audubon society field guide - National Geographic field guide
(not many bright green birds)This report was made from notes made during or after observation, or later from memoryDate of written report: 6/16/02 picture identificationReporting observer: _____ Signature: Danelda BrennemanObserver's address: 714 Carson La Junta, Co. 81050

Send report to: Tony Leukering, P.O. Box 660, Brighton, CO 80601
