1. Species: Painted Bunting Passerina ciris ciris 2. Number: 1
(Vernacular Name) (Scientific Name)
3. Location: 2510 Elizabeth St. Pueblo, Colorado
also in back yard later
4. Date(s): May 2, 1972 5. Time bird seen: p.m. to several minutes
6. Description of size, shape and color-pattern. (Describe in great detail all parts of the plumage including beak and feet coloration in addition to the diagnostic characteristics; however, include only what actually was seen in the field):
I first saw it - a good typical adult male - (refer to the photographs by Robert Breckenzer) - in the cage at 2510 Elizabeth St. Pueblo, Colo. - it was eating well - didn't seem to be injured. Van turned it loose at 6 p.m. that afternoon. I believe it stayed about a week. I saw it fly down to his back yard feeder with several lazuli buntings several days later.
7. Description of voice, if heard: I don't remember
8. Description of behavior: typical perch
9. Habitat - general: not known - first seen in town when it hit a school window
specific: it hit a school window
10. Similarly appearing species which are eliminated 6, 7 and 8 above; Explain: There isn't much it could have been confused with
11. Distance (how measured?): estimated
12. Optical equipment: eyes
13. Light (sky, light on bird, position of sun in relation to bird and observer): artificial and natural - close range in cage - it fed
14. Previous experience with this species and similarly appearing species: none with Painted Bunting
15. What made you think this species was unusual or rare? It was the first Pueblo, Colo. record
16. Other observers: about 30 people
17. Did others agree with your identification? yes
18. Other observers who independently identified this bird: Van Truan, Jack Randell
19. Books, illustrations and advice consulted and how did these influence this documentation: none really needed - male - violet head green on back, red breast - yellow strip up belly -
