

Immature yellow-bellied
Sapsucker in narrow-leaf
cottonwood. Powder Park
(Powder Canyon), Larimer Co.,
CO. January 12, 1992.

Steve Den reported a
"sapsucker" present near
his house since late fall.
Bird was apparently a
♀.

Sapsucker - caused
sap wells on volunteer
Siberian elm along
the lower portion of
Horsetooth mt. Trail. Two
trees like this were seen.
Jan. 20, 1992

Do not know which species
of sapsucker might have done
this.
